EXPERIENCES

Senior Web Developer *Boboko Holding, Tehran, Iran*

As the Head of Web Development, I led a team specializing in the development and maintenance of robust online platforms. My expertise was primarily in back-end solutions with PHP, WordPress, and WooCommerce, where I focused on creating custom plugins and themes to meet unique business needs. I also provided key support for front-end development using JQuery, Bootstrap, and Elementor, ensuring an optimal user experience and strong site performance.

Senior Web Developer *LoyalAxis, Tehran, Iran*

As Technical Manager, I oversaw the development of LoyalAxis CRM, a WordPress-based solution for small and medium-sized businesses. I designed and implemented the core application and over 10 modules, including advanced customer management, workflow automation, WooCommerce integration, and real-time analytics. The project required expertise in PHP, JavaScript, and SQL, modern development practices (SOLID, TDD/BDD, Agile), and cutting-edge technologies (React, Postman, Docker, Git) to ensure scalability, flexibility, and high performance.

Windows App Developer *Lavin24, Tehran, Iran*

As Full-Stack Developer, I developed Lavin24, a software suite for video encryption and customer licensing to protect commercial videos from copying. The system consists of two Windows applications built with .NET (C#) using a complex RAM-buffer video encryption and playback algorithm, and a web solution based on WordPress for user management and license validation. This infrastructure is used by 500+ educational institutions and thousands of students, ensuring secure content delivery at scale.

Scientific Programmer *University of Tehran, Tehran, Iran*

As the sole programmer in the Gravity and Cosmology Group at the University of Tehran, I developed a Python-based simulation to model light trajectories in metamaterials that mimic black hole optics. The program uses numerical methods to solve complex differential equations and visualizes results with Matplotlib. The underlying theory and results were published in American Physical Society (APS) journals.

Web Developer *Freelance, Tehran, Iran*

As a Freelance Web Developer, I delivered 20+ websites and web applications, focusing on performance, scalability, and user experience. I consulted startups on technology stack selection and system architecture, helping reduce time-to-market and improve maintainability. Projects required expertise in PHP, Laravel, WordPress, WooCommerce, MySQL, JavaScript, HTML, CSS, and Linux, alongside Git-based workflows and automated deployment practices. I also gained experience in project management, client communication, and delivering solutions on time and within budget.

EDUCATION

University of Tehran

M.Sc. in Physics
Tehran, IRAN

Sept. 2017 – Sept. 2020

Sharif University of Technology

B.Sc. in Physics
Tehran, IRAN

Sept. 2011 – Sept. 2016

SKILLS

Programming Languages:

PHP

Python

C#

SQL

JavaScript

Languages Proficiency:

English

Farsi

Arabic

Fluent (Toefl:102)

Native

Elementary

Backend Development:

Laravel, WordPress, WooCommerce, Composer, MySQL, Redis, Blade, REST API / GraphQL, JWT / OAuth2, Microservices architecture, Domain-Driven Design (DDD), SOLID, Docker, Linux

Frontend Development:

React, Vue.js, jQuery, Elementor, Alpine.js, Tailwind, Bootstrap, Livewire, Inertia.js, Webpack, Vite, Sass, PostCSS, Accessibility (a11y)

Systems & Workflow:

Git, Docker, Linux, MS Windows, CI/CD,
