 Hasan-Forghani

 0000-0001-5215-4309

Senior full-stack engineer, 7+ years, owning production systems end to end across React/Next.js and Django/PostgreSQL — from .NET video-DRM used by 500+ educational institutions to a WordPress CRM now running 450+ businesses, and LLM-backed products on the OpenAI API. Moves into unfamiliar stacks fast: three greenfield products — Django, Flask and Next.js — from zero to delivery in 5 weeks to 6 months.

EXPERIENCES

Senior Software Engineer

Oct 2025 – Present

Sidraw, Muscat, Oman • Full-time • Remote

- Own architecture on 3 of the 6 client projects assessed since joining; scope and cost incoming work with the CEO before it is committed; mentor two junior engineers.
- Led an AI nutrition-coaching platform as sole engineer and technical lead — Django, PostgreSQL, React and the OpenAI API — designing the data model, prompt layer and chat interface, and presenting the architecture to the CEO, product owner and investors; MVP delivered in under 6 months.
- Delivered the Next.js front end for tehrandarou.com, a commercial online pharmacy, in 11 weeks, rebuilding the customer-facing UX.

Senior Full-stack Developer

May 2023 – Aug 2025

LoyalAxis, Tehran, Iran • Part-time • Hybrid

- Led development of five modules of LoyalAxis CRM — user management, email/SMS marketing, dashboard builder, scrum board and ticketing — mentoring a junior developer and an intern; the product now runs 450+ active businesses.
- Owned the WooCommerce Report Builder end to end as a standalone product, contributed to five further modules, and reviewed the platform's core code.

Head of Web Development

Mar 2022 – Nov 2022

Boboko Holding, Tehran, Iran • Full-time • On-site

- Hired to build the company's first in-house web team; inherited and led 3 engineers (1 backend, 2 front-end and design) across boboko-tech, boboko-build and boboko-service.
- Delivered the e-commerce platforms for a hardware importer handling roughly 100 orders a day, building custom WooCommerce plugins and themes on a PHP/WordPress back end.

Full-stack Developer

May 2019 – Mar 2021

Lavin24, Tehran, Iran • Full-time • On-site

- Built two Windows applications in .NET (C#) — an encrypted video player and a video encryptor — for a DRM platform used by 500+ educational institutions and thousands of students.
- Co-designed the RAM-buffer video encryption algorithm behind them, and built the WordPress back end handling licensing and user management.

Scientific Programmer

Dec 2020 – Dec 2024

University of Tehran, Tehran, Iran • Contract • Hybrid

- Sole programmer in the Gravity and Cosmology Group: simulated light trajectories in metamaterials in Python, solving the governing differential equations numerically; results published by the American Physical Society.

EDUCATION

University of Tehran

M.Sc. in Physics
Tehran, IRAN

Sept. 2017 – Sept. 2020

Sharif University of Technology

B.Sc. in Physics
Tehran, IRAN

Sept. 2011 – Sept. 2016

SKILLS

Programming Languages:

Python, PHP, JavaScript/TypeScript, C#, SQL

Backend Development:

Django, Laravel, Flask, PostgreSQL, MySQL, Redis, REST API/GraphQL, WordPress, WooCommerce

Frontend Development:

React, Next.js, Tailwind, Livewire, jQuery, Bootstrap, Elementor, Accessibility (a11y)

Systems & Workflow:

Git, Docker, Linux, CI/CD, Caching strategies, SOLID, Domain-Driven Design, Microservices, JWT/OAuth2, Role-Based Access Control

AI & LLM Engineering:

OpenAI API, LLM integration, prompt engineering, chat-interface design, AI-assisted development (Claude Code, GitHub Copilot)

Architecture & Leadership:

Technical scoping & estimation, system design, code review, mentoring

Languages Proficiency:

English	Fluent (TOEFL: 102)
Farsi	Native

SELECTED PROJECTS

- </> AI Nutrition Coach** • *Django, PostgreSQL, React, OpenAI API*

Chat-based diet-coaching platform — data model, prompt layer and chat interface built as sole engineer and technical lead.

MVP, 2026
- </> Palmistry Telegram Bot** • *Flask, OpenAI API*

Conversational bot generating readings from user-submitted images; live in limited beta.
- </> tehrandarou.com** • *Next.js*

Online pharmacy and health-products store; customer-facing front end designed and delivered at Sidraw.

tehrandarou.com
- </> Event Management API** • *REST API*

Open-source API for events, hosts and attendees — the one project whose code a reviewer can actually read.

hsnfrghn/event-management
- </> Light-Trajectory Simulation in Metamaterials** • *Python, NumPy, SciPy*

Numerical ray-tracing simulation of light trajectories in metamaterial analogs of black-hole spacetimes, solving the governing differential equations; sole programmer, results published by the American Physical Society.

Phys. Rev. D 106, 124013
